Bionatus

For 25 years, in Brazil, the Bionatus Pharmaceutical Laboratory has dedicated itself to the manufacturing and the distribution of nutraceuticals, health products based on plant extracts and and honey products. With a line of more than 80 products, we always strive to take care of families with quality and dedication. Our factory has a Quality Control laboratory and a production area approved by ANVISA, the Brazilian drug regulatory agency with the issuance of a certificate of good manufacturing practice. Bionatus continually carries out research and development to bring to market new products that meet the needs of customers. We would like to thank all those who contribute to our history because the recognition is above all, the result of customer satisfaction, the quality of our products and the dedication of our employees.

The recently created Laboratoire Bionatus Pharmacognosique Inc. in Quebec, receives all the experience gained during these 25 years of success in Brazil to couple them with the knowledge in pharmaceutical technology of Montreal and regions to develop even more innovative products.

GLUTEN-FREE.

WHY TO CHOOSE *Barovital* ?

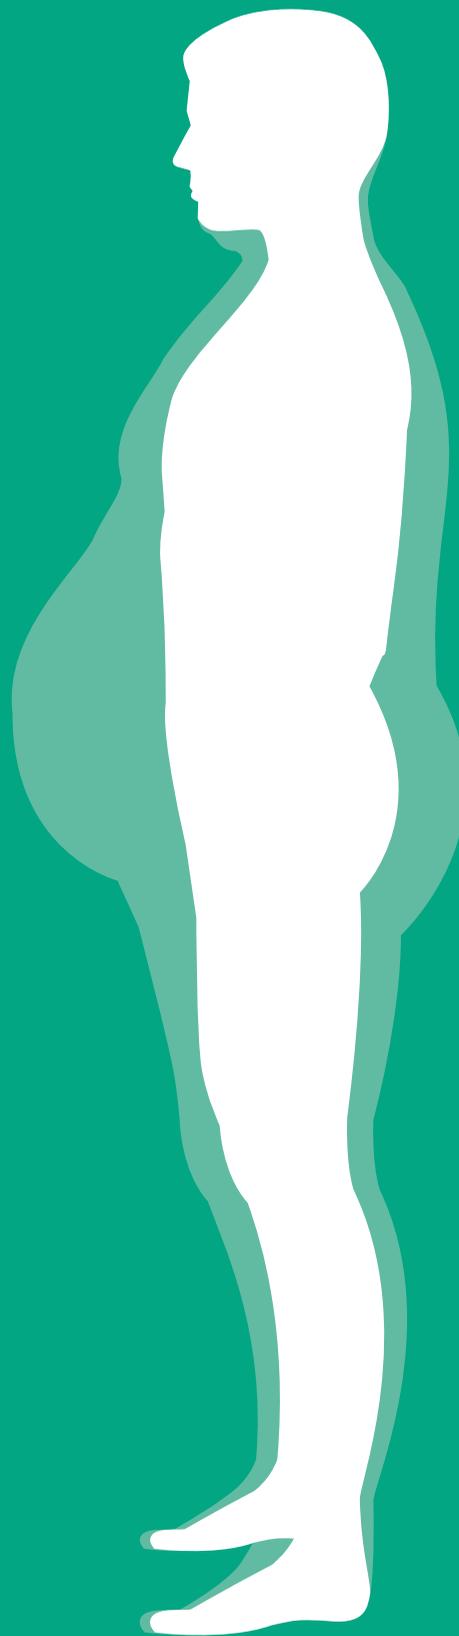

Bariatric patients require postoperative follow-up throughout their lives. It is of utmost importance that bariatric surgeons advise their patients on proper supplementation. One of the major difficulties that bariatric surgeons have is that patients can use a multivitamin with high doses of certain micronutrients daily and without interruption, which would mean many large capsules or tablets.

In Barovital's patented formulation, various measures to facilitate absorption have been taken. This is why the formula is divided into three parts. Barovital comes in mini-tablets and a dispersive powder, which mixed with milk and / or fruit, yogurt, açai and etc. (there are several recipes), is ingested with pleasure. 70% of patients who had a follow-up with complete and thorough information, adhered to the recommendations.

Barovital provides 30 micronutrients compared to competitors with 12 to 22 micronutrients. Micronutrient deficiency can have serious consequences. In the long term, some disorders are obvious: accelerated osteoporosis, pathological fractures, cramps, immunosuppression, risk of infection, severe anemia, neurological lesions, memory loss, among others.

YOUR COUGH HAS ITS DAYS COUNTED

The fluid extract of Guaco (*Mikania glomerata*) a Brazilian plant is widely used as a syrup to help treat respiratory diseases in children and adults. *Mikania glomerata* appears in the first edition of the Brazilian Pharmacopeia of 1929. For many years, the product has been distributed as an OTC on the Brazilian market for its expectorant and bronchodilator actions. *In vitro* and *In vivo* assays showed that Guaco contains natural compounds with anti-inflammatory and bronchodilatory effects. Biotoss is a syrup made from Guaco fluid extract, indicated as a complementary treatment for respiratory tract disorders. Guaco products belong to the phytotherapeutic products list recommended by health professionals in Brazil. Guaco is currently used in the Brazilian Public Health System to help treat respiratory disorders in children and adults. Since 2016, a phase 4, clinical trial entitled: Evaluation of bronchodilator and anti-inflammatory activity of guaco syrup in humans by pulmonary function tests in asthmatics volunteers, is ongoing.

SWEETENED

Biotoss Traditional
Bottle with 120ml

Biotoss Edulito (Sugar Free)
Bottle with 120ml

Biotoss syrup is indicated to help in the treatment of respiratory tract disorders. It facilitates the elimination of respiratory secretions due to respiratory disorders. This product dilates the bronchi, fluidizes and then facilitates the elimination of secretions.

Biotoss 120ml

BOTTLE WITH 120ML SYRUP

MEDICINAL INGREDIENT: Mikania glomerata (Fluid extract) 60 mg
(0.036 mg of Coumarins)

NON-MEDICINAL INGREDIENTS:

TRADITIONAL - Vehicles: sucrose, purified water, sodium cyclamate, sodium saccharin, propylene glycol, hietelose, methylparaben and propylparaben.

SWEETENED - Vehicles: sorbitol, purified water, sodium saccharin, hietelose, methylparaben, propylparaben and mint flavor

INDICATION (ANVISA): Help in the treatment of respiratory tract disorders, facilitating the elimination of secretions present. This product dilates the bronchi, fluidizes and facilitates the elimination of secretions.

Cascara sagrada 380mg - NPN 80063305

45 CAPSULES

MEDICINAL INGREDIENTS (PER UNIT DOSE)

Cascara Sagrada (Frangula purshiana(sterm))380 mg (7.6 mg cascaroside A)

NON-MEDICINAL INGREDIENTS: Corn starch, gelatin

INDICATION: Short-term relief of occasional constipation. This product has a contact laxative effect, facilitates bowel movement by direct action on the large intestine.

DURATION OF USE: Consult a health care practitioner for use extending beyond 7 days

DOSAGE: Adults and adolescents 12 and over: 3 Capsules 1 time a day at bedtime. Swallow the capsules without opening or chew them. The time of onset of action is between 6 and 8 hours.

PRECAUTIONS: Consult a health care practitioner if symptoms persist or worsen. Cascara sagrada must not be used beyond one week. The use of laxatives for longer than recommended can cause intestinal sluggishness, spasms and cramps. Potassium loss resulting from prolonged use of Cascara Sagrada may potentialize digitalis toxicity and arrhythmias when Cascara Sagrada is administered concomitantly with anti-arrhythmic drugs. Some chemical constituents of cascara sagrada are excreted via kidney. Consult a health care practitioner prior to use if you have kidney problems, or if you are taking heart medication such as cardiac glycosides or antiarrhythmic medications. The concomitant use of other drugs that induce hypokalaemia, such as thiazide diuretics and adrenocorticosteroids may aggravate electrolyte imbalance. Consult a health care practitioner prior to use if you are taking thiazide diuretics, corticosteroids, licorice root or other medications or health products which may aggravate the imbalance of electrolyte levels.

Indomethacin may have its effect decreased when administered with Cascara Sagrada. It is recommended not to associate Cascara Sagrada with other drugs except under medical supervision.

Consult a health care practitioner prior to use if you have faecal impaction or symptoms such as abdominal pain, nausea, vomiting or fever. Reduce dosage or discontinue use if you experience abdominal pain, cramps, spasms and / or diarrhea.

CONTRAINDICATIONS: Do not use Cascara Sagrada if you have abnormal constrictions of the gastrointestinal tract, a potential or existing intestinal blockage, atonic bowel, appendicitis, inflammatory bowel disease such as Crohn's disease or ulcerative colitis, abdominal pain of unknown origin, undiagnosed rectal bleeding, severe dehydration with depleted water or electrolytes or diarrhea. Do not use if you are pregnant or breastfeeding..

ADVERSE REACTIONS: Hypersensitivity may occur. Abdominal spasms and irritation of the colon may be observed following the use of Cascara Sagrada. If this occurs, discontinue use. In case of overdose, the main symptoms are abdominal cramps and severe diarrhea with consequent loss of fluids and electrolytes, which are to be repositioned. If this happens, call a poison control center or a doctor, even if you do not notice any signs or symptoms. Bring with you the product packaging.

Gastriless 380mg

45 CAPSULES

MEDICINAL INGREDIENTS (PER UNIT DOSE): Maytenus ilicifolia (Espinheira santa): 380 mg (eq. 13.3 mg of Total Tannins)

NON-MEDICINAL INGREDIENTS: Maltodextrin, Gelatin

INDICATION (ANVISA): Traditionally used in Herbal Medicine in Brazil as anti-dyspeptic, anti-acid and as co-adjuvant in the treatment of stomach and duodenal ulcers.

Gastriless is made from Espinheira santa, a Brazilian plant traditionally used for gastritis. Espinheira santa extract products belong to the phytotherapeutic products list used in the Brazilian Public Health System, as a co-adjuvant in the treatment of gastric ulcer.

EAN-13: 7896108002021

Shipping box: 25 units

Ginseng 500mg

45 CAPSULES

MEDICINAL INGREDIENT (per capsule): Dry extract of Panax ginseng 500mg (eq. 15mg Ginsenosides)

NON-MEDICINAL INGREDIENTS: Gelatin (capsule)

INDICATION (HEALTH CANADA): This product is indicated for physical and mental fatigue. Ginseng is used in Herbal Medicine: to help support cognitive function and/or reduce mental fatigue (in cases of mental stress) to help enhance physical capacity/performance (in cases of physical stress). Ginseng has an adaptogenic action since it does not specifically act on physical or psychological weakness, but it generally revitalizes the body in order to stimulate its own immune system defense against aggressive external agents and promotes physical and mental stimulation.

PRECAUTIONS: It is not recommended to associate Ginseng with drugs such as monoamine oxidase inhibitors like phenelzine, antipsychotic and hormonal drugs, diltiazem, nifedipine, verapamil, digitalis heterosides, ethionamide, griseofulvin, methyldopa, phenothiazines and spironolactones.

CONTRE-INDICATIONS: Ginseng is contraindicated in the cases of acute illnesses, coronary thrombosis, severe cardiac diseases, hemorrhages, schizophrenia, nervous hypersensitivity, hysteria, hypertension, tachycardia and febrile syndromes.

Ginseng should not be used continuously for periods longer than 3 months. Patients should leave intervals of 2 to 3 months between treatments.

There is no data available on the use of Ginseng during pregnancy and lactation, and then, Ginseng should not be used under these conditions, except under medical advice.

This product is contraindicated in children under 12 years of age.

There are no specific contraindications or special precautions for elderly patients.

KNOWN ADVERSE REACTION(S): Some people may experience insomnia, anxiety, or headaches

EAN-13: 7896108002267

SHIPPING BOX: 25 UNITS

Laxasene 350mg - NPN 80063793

45 CAPSULES

EACH CAPSULE CONTAINS:

MEDICINAL INGREDIENTS

Senna (Senna Alexandrina, Leaf).....350 mg (8.75 mg Sennosides)

NON-MEDICINAL INGREDIENTS: Corn starch, gelatin

INDICATION: Mild laxative for short-term relief of occasional constipation. Facilitates bowel movement while acting directly on the large intestine.

DURATION OF USE : Consult your doctor or pharmacist before continuing use, if after 7 days your symptoms do not disappear.

DOSAGE: Adults and adolescents 12 and over: Take 2 capsules once daily at bedtime

PRECAUTIONS: Consult a health care practitioner prior to use if you are taking thiazide diuretics, corticosteroids, licorice root or other medications or health products which may aggravate the imbalance of electrolyte levels. Consult a health care practitioner prior to use if you have kidney problems, or if you are taking heart medications such as cardiac glycosides or antiarrhythmic medications. Consult a health care practitioner if symptoms persist or worsen. Consult a health care practitioner prior to use if you have faecal impaction or symptoms such as abdominal pain, nausea, vomiting or fever. Reduce dose or discontinue use if you experience abdominal pain, cramps, spasms and / or diarrhea

CONTRAINDICATIONS: This product is contraindicated for use in children under 12 years . Do not use this product if you are pregnant or breastfeeding.

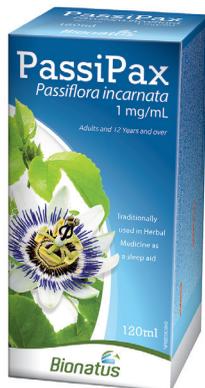

Inform your physician if pregnancy occurs during the use of this product. Do not use if you have abnormal constrictions of the gastrointestinal tract, a potential or existing intestinal blockage, atonic bowel, appendicitis, inflammatory bowel disease such as Crohn's disease or ulcerative colitis, abdominal pain of unknown origin, undiagnosed rectal bleeding, severe dehydration with loss of water and electrolytes. This product is also contraindicated in individuals with hypersensitivity or allergy to any component of the formulation.

ADVERSE REACTIONS

Inform a health care practitioner if the following adverse reactions occur during the use of this product, abdominal spasms problems, pain or discoloration of urine.

EAN-13: 7896108002113

Shipping box: 25 Units

Passipax 120ml - NPN 80063840

BOTTLE OF 120 ML ORAL SOLUTION

MEDICINAL INGREDIENTS (PER UNIT DOSE)

Passionflower (*Passiflora incarnata*, Aerial parts)..... 0.25 ml (1mg of total flavonoids expressed in vitexin)

NON-MEDICINAL INGREDIENTS: D-sorbitol, (p) methyl hydroxybenzoate, (p) propyl hydroxybenzoate, mint flavor, flavor of passion fruit, purified water, and ethyl alcohol.

INDICATION: Traditionally used in Herbal Medicine as a sleep aid (in cases of restlessness or insomnia due to mental stress).

DOSAGE: Adults and adolescents 13 and over: 20 ml, 1-3 times a day. Do not exceed 60 ml daily.

PRECAUTIONS: Consult a health care practitioner if symptoms persist or worsen. Consult a health care practitioner if sleeplessness persists beyond 3 weeks (chronic insomnia). Stop treatment in cases of hypersensitivity reactions and consult a doctor. Do not take doses higher than those recommended. This product should not be used in pregnant women, lactating women and children under 13 years. Consult a health care practitioner prior to use if you are pregnant or breastfeeding. Treatment with Passipax may provoke somnolence. Patient should not drive a car or operate a machine since alertness could be reduced. Passipax potentializes the sedative effects of pentobarbital and hexobarbital increasing the time patients sleep. Alcoholic beverages can potentialize the effect of the product. Consumption with alcohol, other medications or natural health products with sedative properties is not recommended. There are indications that, coumarins present in the species have a potential anticoagulant effect and could then interact with warfarin, but the studies are not conclusive. The use of this product with inhibitors of monoamine oxidase (Isocarboxazid, Phenelzine and Tranylcypromine) may cause an additive effect.

CONTRAINDICATIONS: Passipax is contraindicated:

In patients with a history of hypersensitivity and allergy to the components of the product formulation. In patients on sedative, hypnotic or antihistamine drugs therapy. During the consumption of alcoholic beverages. In pregnant, lactating women and children under 13 years.

ADVERSE REACTIONS: At recommended doses, There is no adverse effects of Passipax. In rare cases, it can have adverse reactions, such as nausea, vomiting, headache, and tachycardia. Hypersensitivity (eg. allergy) may occur. If this occurs, discontinue use. Excessive doses may cause prolonged sedation and states of somnolence. People experiencing somnolence after taking Passipax should not drive heavy machinery or a motor vehicle, or undertake activities that require alertness

Shipping box: Units

Variless 280mg - NPN 80063844

30 COATED TABLETS

MEDICINAL INGREDIENTS (PER UNIT DOSE)

Horse chestnut (*Aesculus hippocastanum*, Seed) : 280 mg (50.4 mg of Aescin)

NON-MEDICINAL INGREDIENTS : Microcrystalline cellulose, silicon dioxide colloidal, croscarmellose sodium, magnesium stearate, magnesium silicate, Hydroxypropyl methylcellulose, poly (ethylene glycol), Maltodextrin

INDICATION

Help to treat hemorrhoids, varicose veins, chronic venous insufficiency and associated symptoms such as the sensation of pain and heaviness in the legs, swelling, cramps, itching and capillary fragility

DOSAGE

Adults: 1 tablet, 2 times per day or as deemed by your physician or your nutritionist

PRECAUTIONS

Consult a health care practitioner prior to use of Variless if you are pregnant or breastfeeding.

Although there is no restriction of use in the elderly, they should consult a health care practitioner before using this product.

Patients receiving oral anticoagulants should not use Variless.

Variless should not be administered with nephrotoxic drugs such as gentamicin.

Horse chestnut also decreases blood glucose and may therefore enhance the action of antidiabetic drugs.

CONTRAINDICATIONS

Variless is contraindicated in:

- People with known hypersensitivity and allergy to compounds present in the formula of Variless, and also in people hypersensitive to aescin or extracts of *Aesculus hippocastanum*.
- Children under 12: there are toxicity reports showing that aescin absorption is higher in children, predisposing them to greater toxicity.
- Patients with renal failure and liver failure: It is also known kidney and liver toxicity reports of herbal products containing chestnut horse.

ADVERSE REACTIONS

Some people may experience headaches, dizziness, nausea, itching, and stomach discomfort. In rare cases, it can cause gastric irritation and reflux.

Saponins present in *Aesculus hippocastanum* seeds can cause contact dermatitis in patients with hypersensitivity to this product.
